

Cause No Harm

New Logo Launched

In March 07, we developed and launched our new Cause No Harm logo which you see at the top of this page. It is our intention to display the new logo on our letterhead, website, any other applicable areas and relevant documentation.

Later we will produce stickers and other items designed to remind us each moment, to Cause No Harm.

Notice we said each moment, as this is when we should consider whether the results of our actions we are contemplating or executing will result in harm to:

-  Ourselves
-  Others
-  Materials and equipment
-  The environment in which we work
-  The planet as a whole
-  Future generations

**Think
before
you act**

Practical Application

Cause No Harm to Ourselves

As Swiber employees, without being overly harsh on ourselves or judgmental, we will give thought to our personal choices and ask ourselves, "Will this choice I am making or considering, result in causing me harm"?

Preceding all action comes a thought and it is at this stage that we can address the idea – will this cause harm to me?

It may be a simple activity such as smoking, eating or drinking. It may be our actual work activity from leaving a filing cabinet top draw open to rigging up a heavy load on an offshore vessel. "Will this cause me harm"?

There are many facets of our lives which Cause No Harm may be applied, not just in the workplace.

Carry this principle home to your children, family and all activities, from driving your car or motorbike, to the myriad of actions you do around your home. Make causing no harm to yourself a way of life.

Next month we will give tips on causing no harm to others

Our Vision:

Together we establish a world class oil and gas service organisation by 2012

Did You Know?

The Swiber Jack-Up No 1 barge was launched on 4 April 07

Congratulations and a big thank you to all concerned with bringing this vessel from an idea, to the drawing board and on to completion.

A job very well done!

BSP Contract was formally signed on the 19th April 07.

Swiber is moving closer to establishing ourselves in the Middle East, most probably based in the UAE.
